

COVID-19 MYTH BUSTERS

PraDigi
PRATHAM DIGITAL

✘ MYTH

I've already been diagnosed with COVID-19, so I don't need to receive the vaccine.

Once I receive the COVID-19 vaccine, I no longer need to wear a mask.

✔ FACT

If you have already had COVID-19, there's evidence that you can still benefit from the vaccine. Avoid taking vaccine if you are currently suffering from Covid 19. After full recovery you can take the vaccine after the gap of 3 months. For any doubts consult your doctor.

Masking, handwashing and physical distancing remain necessary in public until a sufficient number of people are immune.
